OBJECTIVE:

Being a teacher, I find education as my life. As such I educate myself and never stop to learn. Because I think I can make the most impact on my students on such a limited time if I gained more knowledge and become more efficient. I wanted to be the best at what I do so it would mean for my students. My philosophy for becoming a teacher is not only to share skills and knowledge but to be a part in the transformation of this society.
